

Aptamil RANGE

IMPORTANT NOTICE: Breastfeeding is best. Infant milk is suitable from birth when infants are not breastfed. Follow-on milk is only for infants over 6 months, as part of a mixed diet and should not be used as a breastmilk substitute before 6 months. We advise that the use of formula milks and the decision to start weaning should be made only on the advice of a doctor, dietitian, pharmacist or other professional responsible for maternal and child care based on infant's individual needs. Use Toddler milk as part of a varied and balanced diet from 1 year. Foods for special medical purposes should only be used under medical supervision. May be suitable for use as the sole source of nutrition for infants from birth, and/or as part of a balanced diet from 6-12 months. Refer to label for details.
